If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..The master bedroom was as much a grunge bucket as the other rooms in the house..Rastus looked puzzled. "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need."
